Welcome to Oracle Corporation: Fact Sheet

Business Essentials

Oracle Database, the first relational database designed for grid computing, helps ensure that enterprise information is always available and secure. Oracle Database lowers the total cost of ownership through automated management while providing the highest quality of service and the ability to innovate faster with confidence. Oracle is the most reliable choice for large enterprises, small and medium businesses, and departments alike.

Oracle Fusion Middleware consolidates Oracle's leading, standards-based software—Oracle Application Server, Oracle Content Management, Oracle Master Data Management, Oracle Developer Tools, Oracle Identity Management, Oracle SOA Suite, Oracle Business Integration, Oracle Business Intelligence, and Oracle WebCenter Suite—and delivers the industry's most comprehensive and seamlessly integrated service-oriented architecture (SOA) software infrastructure. This product family provides business value and technological innovation, with complete support for the development, deployment, and management of SOA.

Oracle Applications include several product lines—Oracle E-Business Suite, PeopleSoft Enterprise, JD Edwards EnterpriseOne and JD Edwards World, Siebel, and Hyperion—whose combined scope and strength of functionality mark a turning point in the evolution of the software industry. By enabling information-driven processes that connect and automate the entire enterprise, Oracle Applications deliver the complete functionality and business intelligence that companies need to compete and win.

Oracle industry applications, based on in-depth expertise and industry-specific functionality, address the unique challenges and processes that drive today's businesses. In recent years, Oracle has enhanced its industry offerings by making a number of strategic

acquisitions, including Retek, ProfitLogic, 360Commerce, MetaSolv, i-flex, Portal Software, TimesTen, HotSip, Net4Call, G-Log, Demantra, Agile, SPL WorldGroup, and LODESTAR. Retailers, manufacturers, communications companies, utilities, and financial service firms are among the many businesses that have profited from these additions.

Oracle Services help businesses get the most from their technology investment. Working with our customers every step of the way, Oracle provides a variety of services that span the complete solution lifecycle. Oracle On Demand delivers the world's leading software to end users and manages IT infrastructure, software, security, service levels, and IT governance—allowing companies to focus on their core business. Oracle University delivers flexible, quality instruction with a commitment to customer satisfaction—offering more than 500 courses that cover virtually all of Oracle's products. Oracle Consulting assembles, optimizes, and manages the software that puts business data to work. And Oracle Support offers comprehensive maintenance and problem resolution for Oracle technology and application products, so customers can get the level of support that suits their business.

Dedicated to Customer Success

Oracle's commitment to providing industry expertise and world-class products to its customers could not be stronger. Customers, partners, and analysts recognize the comprehensiveness and strength of Oracle products and services, which have been carefully developed with the input of thousands of valued customers through customer advisory boards and Oracle user groups. When a customer achieves success with Oracle products and services, everyone profits—customers, partners, employees, investors, and Oracle.
